

Comprehensive, Integrated EDC Software

Manage your Clinical Trial

Change your outcomes, not your entire business process. Prelude Dynamics, LLC offers you the most complete, most cost-effective EDC solution on the market today, with an excellent TCO (true cost of ownership), strong CTMS features and an unmatched service record. We answer your calls promptly with highly trained, in-house support.

Our VISION product provides the clinical trial manager with a high-reliability, 21CFR11 compliant, software system with all the features needed to capture, clean and prepare data for your FDA submission. The product goes well beyond standard EDC capabilities, including inventory controls, financial and statistical capabilities.

Systems Quality and Compliance

Prelude Dynamics' Vision and objective is to provide our clients with a visually elegant, highly innovative, rich client on the server but with a zero footprint on your user's system. Our browser agnostic software means you are free to use any standard Internet browser. VISION offers fast page turns, and unsurpassed speed of implementation for all Phases of studies from pre-clinical to Phase IV/PMS. The software has been independently audited and is 100% compliant with FDA and HIPAA regulations and receives regular praise from our customers for high usability, and ease-of-use. We provide fully integrated solutions from Study Definition through data entry, image management, dictionary coding, clinical data review tools, rapid form development, and full audit trails. The system provides role-based permissions and allows single key or double-data entry, interactive range, value, cross-form and field checks, representing a full-spectrum, accomplished EDC suite with complete tools for FDA submission.

Extreme Flexibility

Trial setup is not dependent on custom programming yet everything from forms design –and redesign – to mid-study changes are easily performed by our trained support staff. Our customers have implemented major workflow changes for a study and have been able to do this by communicating with us in a single technical support session, with solutions and changes implemented in a matter of hours. As in real life, change can be difficult or painful. Unlike other EDC products, however, recovery from change is easy with VISION.

Contact us today and let us prove it to you!
